lcomida006@gmail.com ♦ +63 945 330 9931 ♦ Concepcion, Rosario, La Union

PROFESSIONAL SUMMARY

Motivated and adaptable Computer Science graduate with hands-on experience in programming, hardware, and administrative support. Passionate about technology and eager to apply a solid academic foundation and practical skills to contribute effectively in any IT-related role. A fast learner and team player committed to continuous growth and delivering quality work in a professional environment.

WORK EXPERIENCE

Rosario PNP

On-the-Job Trainee (OJT) — IT & Administrative Support | Jan 2024 – May 2024

- Provided administrative support including data encoding and record handling, ensuring accuracy and organization across all documentation.
- Designed and edited 20+ digital posters and visual materials to improve internal communication and presentations.
- Collaborated with staff to optimize daily office operations, enhancing workflow efficiency by approximately 20%.
- Delivered exceptional customer service by guiding applicants through procedures and requirements, improving user satisfaction scores.
- Assisted in troubleshooting basic technical issues, contributing to smoother daily IT operations.

PROJECTS

Automatic Waste Segregation System

Arduino / C / MySQL

Designed and built an Arduino-based automated waste segregation system that classifies waste types using sensors. Integrated a MySQL database to log waste data and generate disposal reports, promoting efficient and eco-friendly waste management.

Financial Management System

MIT App Inventor

Developed a mobile application using MIT App Inventor for tracking personal and organizational finances, including income, expenses, and budget monitoring with an intuitive user interface.
